

**SPECIAL COMPLEMENTARY REPORT**

***"Why Inspired Living Now"***

***"Achieving True Prosperity"***

## Why Inspired Living Now?

In these challenging times are you living the life you desire and deserve?

Do you find yourself reacting to life's events and challenges?

Do you notice and observe others that seem to be more in the flow of life?

Are you engaged and committed to Inspired Living? If not what are the internal and external barriers that you face?

### **Let's look first at the internal, self-created barriers:**

Let's have a little look into 5 people's lives and why they may be struggling and not realizing the benefits of Inspired Living.

#### **1. People don't know what the Inspired Living alternative is and that it is possible to create a more successful and abundant life.**

Bob accepts his life as it is and just puts it all down to fate. He doesn't know that he creates his reality, and therefore, he doesn't know he can change his reality. His underlying worldview is that he does not have the life he wants because of the state of the economy, the president, which political party is in power, where he lives, who he works for, who his parents were, his family conditions, etc.

His life is chaotic. He gets pushed and pulled around by the will of others and outer conditions. He thinks his only hope for a better life is to win the lottery. He has not come to the awareness that he is creating his life so he sits back, plays the victim and waits for whoever is victimizing him to quit doing it so he can get on with his life. **He lacks knowledge.**

We know you're not like Bob. Just by reading this, you know you CAN create a better life.

**2. People don't know specifically what they want and are giving more attention and focus to avoiding what they don't want.**

Patricia wants more out of life and knows that she could do something about it, but she is not really sure exactly what she wants.

She has never written down her goals nor her plan and ideas for achieving them.

She spends more time thinking about the things she doesn't want in life, and therefore attracts more of the same.

**She lacks clarity of direction and vision.**

**3. People don't know how to achieve what they want or why they want it...**

Sandra's kids have now all left home and she wants to pursue her dream of having a home-based business, but is unsure where to start.

She hasn't spent any time learning what she needs to do, and has no plan, no strategy and no effective tools to help guide her.

When we asked her to briefly explain why she wants a home-based business she has great difficulty articulating a clear statement of purpose. As she talks about having the business she is very unclear of what it would mean to her to actually have the business.

**She lacks direction and is hesitant to move forward because she is fearful of how it will all come together and be achieved.**

**4. People don't really believe they can achieve what they want...**

Roger wants to create an online website and business selling his unique art made from empty beer cans (he has lots of them). He's been studying how to create his

website and has it all worked out... but deep down he doesn't really believe he can achieve any success.

He has hidden blocks and self-sabotages his progress. Although he's been studying website creation for nearly 2 years, he has problems getting started.

**He lacks confidence and belief.**

### **5. People have problems staying focused and motivated...**

Ruth's master-plan was to make enough money to travel around the world. She really wants to visit Australia and cuddle a koala bear.

She's been selling second hand games on E- Bay and a weekend stall at a local Flea Market and was working hard towards her dreams, but she didn't see enough progress and found it difficult to keep going.

She gave up her market stall ...and her dreams ...and bought a koala cuddly toy instead.

**She lacks focus, persistence and resilience...**

Maybe you're lacking a clear vision of what you want? Or effective tools? Or maybe you need help with confidence, motivation or focus?

Or maybe anxiety, stress, or ill-health is holding you back?...

Do you know any of these 5 people? Do you see any of these issues and challenges in your own life? Are you searching for better answers to the questions raised above and other related questions that are showing up in your internal conversations and mind chatter?

If you answered YES we believe we can provide some guidance and help.

**Now let's consider the external and environmental barriers.**

There can be little doubt that we are in transformational times. Changes in so many areas are happening at an ever-increasing rate. The reach and extent of these factors is also increasing in scope and duration.

Let's look at a partial list of the external and environmental barriers that can impact our engagement in Inspired Living:

- ▶ Dynamic and rapid shifts in computer technology
- ▶ Dynamic and rapid shifts in communications and personal people-to-people connections
- ▶ Trends in economic/industrial sectors in the economy
- ▶ Greater interrelatedness across regions and countries
- ▶ More frequent and intense environmental storms and damaging events with greater economic and personal damage and loss
  
- ▶ The ways of making a living of only 5 years ago are not working as well today and for too many, they are not working at all. There are new rules and methods as to what working and earning a decent living are all about.

**“Today, our world faces some serious financial problems. Many are interrelated problems, one causing the other. Some of the more pressing one are:”**

- |   |   |
|---|---|
| ◆ Value of the dollar falling                   | ◆ National debt increasing                    |
| ◆ Baby boomers starting to retire               | ◆ Oil prices rising                           |
| ◆ Gap increasing between rich and everyone else | ◆ Social Security and Medicare going bankrupt |
| ◆ Jobs being exported                           | ◆ Wages decreasing                            |
| ◆ Savings being wiped out                       | ◆ Lack of financial education                 |

But what if it were possible to live an inspired life and be prosperous in any economy. We believe and know it is because we personally experienced that in the early 1980s in an economic crisis in Venezuela. There the inflation rate rose to well over 60% as a result of a currency devaluation. We noticed and began to model people that were living well, based on some different knowledge and wisdom, despite what was going on in the economy. (We share much of what we learn from that experience and the knowledge we are sharing about Inspired Living.)

## **Finally let's discuss; Why you might want to learn about INSPIRED LIVING NOW.**

**Here are 10 reasons that might motivate and inspire you to study and apply the concepts and principles of Inspired Living Now:**

- 1. It is based on Universal principles, spiritual truths and ancient wisdom. It pulls together and integrates ancient wisdom, religious truths and Quantum Physics. Inspired Living** reconnects you with your own inner truths and helps you realize what you knew, but had forgotten; that as a child of the Universe and Spirit you are worthy, loved and prosperous. (It can help you access more of who you came here to BE. It will remind you of who you really are and how the Universe, Spirit and your Divine is on your side and supportive of who and what you came here to BE.)
- 2. It is rooted in time tested proven principles. Inspired Living** works because it is based on principles that work for everyone, everywhere, all the time, when applied. (We can move forward with increased confidence and greater commitment knowing that these truths and principles work, when we work and apply them.)
- 3. We can share Inspired Living Principles** with family, friends and everyone seeking to uplift and improve their life. (Learning about Inspired Living will enable us to be an example of possibilities that we can share with those we love

and care about. You will be joining with thousands of fellow life travelers that are on the forefront of creating an expanded paradigm for a abundant life for all.)

4. **Learning to fully engage in Inspired Living is like lifting a veil. Inspired Living** creates an expanded awareness and perspective leading to expanded inspiration - **“In Sprit.”** (Inspired Living can help us understand the spiritual **"causes"** behind all **"effects."** It can remove the fog and enable us to see and create the future with improved insight.)
5. **Changes made using Inspired Living Principles are fast, effective and long lasting.** Spirit is in the NOW. What you believe, think and act on determines your outcomes and results. (We will show you how to recognize positive changes in only a few days when you shift to Inspired Living. When you know what to look for you will see rapid progress, first in small things and then as you continue, in every increasing larger changes.)
6. **Inspired Living encourages responsibility and creativity.** Now more than ever before, we need to see things from a perspective of personal responsibility and growth. (You will begin to see and experience that you are "At Cause" in your life rather than being at "The Effect.")
7. **Inspired Living encourages engagement, motivation and drive.** It develops expanded hope, optimism and enthusiasm. (You will see events and your unfolding life from a higher perspective, an inspired and much wiser viewpoint, drawing on your deeper internal wisdom. You will realize that you are NOT ALONE and that other people, new conditions and help of a higher order are all supporting you)
8. **Working harder to make your life work, using the same approach and thinking of the past won't work. *"The problem can't be solved from the level of consciousness that created the problem."*** This famous quote from Dr. Albert Einstein guides us to the foundation, the principle, of so much that we want to share with you in Inspired Living. (You will envision your life from a

higher level of consciousness and as you do you will bring into play new and better causes.)

9. **We can only connect the dots in our life by reviewing our past. However, there are no dots to connect going forward, are there?** This suggests that we need to access more of our inner wisdom, our intuition, our higher-self and our spiritual-self in order to find better solution and pathways to create our future. (Inspired Living provides and shares guidance into the future so that we are not driving into the future looking into the rear view mirror of our life.)

10. **Inspired Living has “life-long” benefits** – even into others realms of being; **“As above - so below .”** (These concepts and principles, to the best of our knowledge, are at the very core of life on all levels or expression. We can apply them now to create a better life in our current condition, while also knowing that they will and can serve us in all conditions, as they are fundamental to life itself.)

## **Our Invitation**

Look back over the above list of 10 reasons. Which ones speak to you? Which ones called to you saying: "YES, that is my reason?"

We know that you and everyone has within themselves the potential to create and live an inspired, abundant, and successful life. We invite you to join with us in the journey of inspired living. On this journey we will share some things with you that we have learned from others and from our own personal experiences.

We cannot travel your journey or that of any one else. We have every confidence however that you can connect your own dots and find your own path to Inspired Living.

By drawing from our model, which we have also modeled from many others, we believe your inspired life and the resulting benefits can be realized; sooner, with less effort, with reduced worry, with greater confidence and optimism.

Over the next few days you will be receiving more valuable information from Inspired Living. Watch for them in your email and be sure to save our address.

**Welcome to Inspired Living.**
